

Automatic Pallet Dispenser

The Automatic Pallet Dispenser incorporates into our semi-automatic bag filling systems and allows users to load or dispense pallets from any of three different axes. The system is highly configurable to fit the needs of a facility and can integrate into an existing controls system.

The Automatic Pallet Dispenser offers significant savings on labor to provide a short payback period.

FEATURES

- Flexible layout: pallet can be distributed in any one of 4 directions
- Can be used as a floor level pallet stacker/de-stacker by adjusting leg configuration
- Simple and reliable operation using heavy-duty pneumatic actuation. No hydraulics involved.
- Easily configurable for explosion rated areas, washdown hygienic applications, etc.
- Easily adjustable discharge elevation from floor level to 30" Conveyor height.
- Can be supplied with a micro-PLC control panel for standalone, manual or automatic operation.

SPECIFICATIONS

PAYLOAD	Maximum stack weight of 1,500 lb./680kg.
STACK HEIGHTS	Up to 20 pallets
THROUGHPUT	Up to 180 pallets/hr.
